Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: The Applicant Representatives discussed the feature in Claim 1 wherein a plurality of templates are created and stored and then one of the template is selected based on the receiver's demographics. The Examiner noted that he had interpreted the reference's disclosure of a user creating a template and storing the template in a template directory as disclosing a plurality of templates. Upon further discussion it was agreed that the reference's template directory was not clearly defined and seem to be referred to in various contexts within the specification. The Examiner suggested the Applicant's submit another after-final response highlighting this argument and agreed to provide another office action, possibly switching the 102 rejection to a 103 rejection.
